SUMMARY

Product-driven builder with a proven 0-to-1 track record turning frontline operational friction into high-impact products. Skilled at user discovery, MVP scoping, and cross-functional leadership—with work spanning AI workflow tools at Microsoft (~80 hrs/mo saved), web checkout integrations at PayPal, and a frontline operational platform serving 300+ daily active users across 10 Amazon facilities. I approach product management with an everyday instinct for user discovery: uncovering what people love and hate about an experience, and testing zero-budget, high-impact solutions that solve real pain points.

PROFESSIONAL EXPERIENCE

Microsoft | IT Technical Trainer (Internal Product & AI Lead) - Sep 2024 – Present

- **0-to-1 AI Product Launch:** Scoped and launched an AI content authoring tool for 15+ global L&D managers, cutting cycle time by 40% (5 to 3 wks in pilot) and saving ~80 labor-hrs/mo with human review gates.
- **Requirements & Architecture:** Partnered with engineering leads on user discovery, PRDs, and backlog prioritization; engineered structured JSON contracts in Copilot Studio and Power Automate.
- **Adoption & Scale:** Owned Global Training rollout across 15+ sites (616+ users, 20 trainers); founded 200+ member community converting field feedback into 11 curriculum iterations and 5 SOP updates.

PayPal | Support Engineer (Product Execution) - Mar 2023 – Sep 2024

- **Merchant Checkout Integrations:** Partnered with PMs and engineers to resolve payment API & checkout constraints for 10+ enterprise clients daily, converting friction into reusable technical guides.
- **AI Support Agent Optimization:** Operationalized internal AI support agent via QA testing and ticket log analysis (~1,000 requests/mo, resolving ~50 tasks/mo / ~0.75 FTE capacity throughput).

Amazon | IT Support Technician II (Internal Product Owner) - Jul 2021 – Feb 2023

- **0-to-1 Discovery & Launch:** Shadowed warehouse technicians across 50+ shift hours to identify a 5-min bottleneck; pitched, designed, and built an AWS web ticketing tool (JS/HTML/CSS).
- **UX Optimization & Lifecycle:** Replaced 20+ click forms with prefilled templates (80% submission time reduction, ~9,977 hrs/yr freed); shipped 3 major releases expanding across 10 sites (~300 DAU).

FEATURED PRODUCT PROJECT

Practice Lab Studio | Public Interactive Product Walkthrough

- Built anonymized web application demonstrating end-to-end learning product workflows: document parsing, exercise generation, review gates, and asset exports.

EDUCATION

- **Western Governors University** | B.S. in Business Administration (Sep 2025)

SKILLS & COMPETENCIES

- **Product & Delivery:** User Research, Persona Mapping, PRDs, MVP Scoping, Usability Testing, Backlog Prioritization, GTM, Stakeholder Alignment
- **Technical Stack:** Copilot Studio, Power Automate, AWS (S3/CloudFront), JavaScript, HTML/CSS, JSON, Jira, SharePoint
